The Productivity Suite is a comprehensive set of software products that has been conceived to increase user productivity on the desktop. It includes a number of products, all of them with an embedded helpdesk feature: An active scheduler, the Internet Time, a powerful and easy to manage contact manager, the Internet Help Desk. It is available for Windows 8, Windows 7, and Windows Vista; it can be managed by either the Local Administrator or the All Users account. What is Internet Help Desk? The Internet Help Desk is a perfect web-based customer helpdesk solution to keep track of all the interactions from your customers. As they enter information by using their web browser, Internet Help Desk will keep a reliable record of what they enter and automatically filter out any duplicate information that may be provided. The Internet Help Desk allows you to get a complete view of the interactions your customers have had with your business. You can simply log into Internet Help Desk, create a new case and create or edit it. You can also view the previous activities related to a case, create new ones or check out all of the ones already existing. Internet Help Desk easily integrates with a wide variety of leading applications, CRM solutions and desktop-based helpdesks to provide you with everything you need in one place to take full advantage of the Internet. Internet Help Desk is based on the well-established Helpdesk software, Solidarity, developed by Software AG. It is developed to run in a web browser, providing you with the ability to solve your customer's problems 24 hours a

day, seven days a week. This is a FREE Powerful Web-based Helpdesk Solution to keep track of all the interactions from your customers. It allows you to capture and convert any type of input, no matter how may or many types of input are provided by your customer. It is based on the popular Help

What's New in the Customer Database Pro Multi-user?

CDB is the most complete and powerful client for SQL Server on the market today. You can use it from any browser or any platform (desktop, server, mobile) and you do not have to install anything on your SQL Server for it to work. CDB will help you manage your customers better by: - saving time by not having to manually create and update any databases - helping you keep your SQL Server up-to-date - helping you manage your SQL Server licensing - helping you customize your apps to meet your needs CDB can also help you: - dynamically create the data store (no schema required) - create views - update your database without manual intervention (no DTS jobs or other scripts required) - streamline your helpdesk and contact management - keep track of open cases for each client - keep track of pending activations, updates, and installs - manage any other data point related to your customers CDB is Windows ONLY.
