Clibor Crack+ Free PC/Windows Latest

Clibor is a software application which can be used in order to save several items to the Clipboard, manage them and configure multiple parameters. The advantages of a portable app The installation process is not a prerequisite, as this product is portable.

As a result, it is not going to update the Windows registry and hard drive with new entries (as installers usually do), and no remnants are going to be left behind after their removal from the disk. Another noteworthy aspect is that you can easily take Clibor anywhere with you can run it on any PC you have been granted access to, by simply placing the program files to a USB thumb drive. Import and export, backup and restore capabilities This utility stays in the system tray from the first launch, a feature which greatly enhances ease of use, as it makes it non-obtrusive and helps you access all the save items with great ease.

All copied items are automatically saved to the Clipboard, while you can also save particular phrases and organize them in groups. The latters can also be imported or exported using CSV files, while you can also take advantage of backup and restore capabilities. Parameters you can configure From the settings panel, you can change the font used throughout the program, enable encryption of stored data, set up a password, save Clipboard history even after closing it and play a sound when text changes. It is also possible to change colors used for the interface, customize hotkeys, choose regex or normal search, change the main tab in the main window to “Phrases,” show the search box in the main screen and show tool tips. Conclusion and performance It does not hinder the computer’s performance as the CPU and memory usage is low at all times, while the response time is good. The interface is accessible to both beginners and highly experienced users, and our tests have not registered any problems such as hangs, errors or bugs. All in all, Clibor proves to be a pretty handy piece of software when it comes to managing your Clipboard in a more efficient manner. Editor note: we removed other features after a reviewer request. It is a handy utility that creates a small window on your screen, named “Clipboard list”. It is located next to the start menu and uses as many resources as a process. It is a utility that creates a small window on your screen, named “Clipboard list”
