
VSCO Film Bundle Pack 0107 For ACR

California Lightroom Mobile Desktop Preset Pack for Photographers. And today I begin to talk about these wonderful finds. I must say right away that these action sets are not mine. It's just that I really love and respect Canon, and these kits are very "on topic" and fit my requirements. And it's good that this is my choice, because in life I can choose an action set for myself that will fully satisfy my needs in this. My review can be read here. And now I will show everything in order. I'll start with minimalism. The set includes: 1. 6 packages with processing presets: - all photos of my people (4 pcs) - and some home photos taken with a smartphone - e-book 2. A kit for working with a preset, which includes a converter program, editing, and these packages: All bags are of very high quality, have already been tested more than once and I can say with confidence that each of them works very well. Here, for example, on the left you see preset number 4. For those who don't know, this is a jumar that allows you to take barrel-shaped and curly shots (as in the photo). I don't really understand why it is needed for a home archive, but for photographing it's the most :) and the second package Third package And fourth And here's what's included in package #1: this is my favorite "Flare" preset and photo studios with it. Personally, I love it :) Even though this pack is very small and can be used as a "guest" preset, I still recommend picking it up. Because with its set you get a very flexible ability to import from Lightroom RAW or JPEG. So, besides the fact that with its use you can make "jumar", the package makes it very easy to adjust the shooting parameters (sharpness level, contrast, saturation, etc.). And this is a very big plus. Look, the photo shows a cat! And this is how it turned out after processing with me with this package. As you can see, the cat doesn't care that the window has good sunny weather and that it is reflected from it and shines directly into the camera. With package number 1 you can remove this unnecessary "peas
