Version 40 is a significant improvement over the previous Java 6 update 39, and contains new features that make it more useful than before. This update makes Java more secure, its performance more consistent, and it is also faster, which is why some have been talking about it as being "J6U40" or "K40". This is a professional structural engineering software which

is used for both initial design of structures and detailed design and analysis of all types of civil structure.
