The only thing that is lacking is a built in tutorial which may help beginners use the program. Impossible to Work With I was extremely excited to get a cheap program at the computer store after seeing the countless times it was recommended on Softpedia and other websites. I was disappointed in the program's functionality. After figuring out how to create a macro, it took me a half hour just to get to that point. After editing/sorting/etc. a macro, I clicked on the "save" button and got the error message "Cannot Save. Make sure that the file is not open for writing or that the program is not in multi-tasking mode." Needless to say, I wasn't able to figure out how to save. "Reading" the program was also difficult and to no avail. I was unable to find instructions on creating macros or saving/exporting them to my clipboard. I was also unable to find a manual or help file and had to try to figure things out (from the internet) by experimenting for a
