decompiler pro By default, you need to keep the .NET framework version as Microsoft .NET Framework 4.6.1. Since the .NET framework is already installed in your system, the VB decompiler tool will download the latest version. The whole process is very quick and you don't need to have any special skills to use this VB Decompiler. You just need to download the tool and the code of the exe is very easy to understand and follow. When the decompilation is finished, you can open the decompiled source code and study it for whatever problem you need to fix. The same makes this VB Decompiler to be used for programmers who want to skip the .NET Framework installation step. You don't need
