MinMax G-code aims to be the simplest way for you to extract coordinate values from G-code files. While previous apps require that you import G-code files and have to manually input values, MinMax G-code helps you just import G-code files and automatically extract all the necessary coordinate data. It doesn't matter what G-code file format you are using (M, G, T), because MinMax G-code will extract them all no matter what their standard. MinMax G-code will even work with G-code formats such as Mmm, Gg, and Ggg. It is also worth noting that once the coordinate data is extracted, MinMax G-code will automatically paste it to the clipboard for

you and this way you won't lose any precious time when working in CNC software. MinMax G-code screenshot: MinMax G-code tutorial: So, if you want to extract coordinate data from G-code files and then paste it to an application such as CNC software, then you need to use a tool like MinMax G-code. It will extract all the coordinate data from G-code files and paste them to your clipboard. This is ideal for users who need to be more efficient and don't want to waste time copying and pasting operations. The app comes with a simple interface that can be used even by those who are not tech-savvy. It contains a handful of preset keyboard shortcuts for quick action. It also offers a simple main page for browsing files, and

---

providing users with shortcuts for easy navigation. The app is limited only to specific file formats such as Gg, Mmm, and Gg. These are the only three standard formats available that users will need to be proficient to use this app. To extract coordinate data, users must simply select the file type, and then open the file. This will help the app eliminate any possibility of human error. The app stores all the extracted coordinate data in the clipboard, which can be easily accessed in other applications and that way users won't lose any time. MinMax G-code app: The app gives users the option to send the data extracted to the clipboard to other applications as well. All users have to do is to select the export option and save the
