Both are actually bundles (which you will never know until you try to crack/reg the software). Sorry, you can't download or install this software right now.. Within the trial version of Nero Ultimate, there is a optional upgrade to Gold.. I used this software for a long time with Norton Internet Security, which gave way to McAfeeâ€™s free version.Q: adb shell stops communicating after some time I am trying to run adb shell at a time but at a certain time, the adb shell stops talking to me, this is quite a weird behavior, like for example, if I run the command adb shell am start -a android.intent.action.MAIN -c android.intent.category.LAUNCHER -d "" then it opens the browser successfully, but in certain cases it doesn't work, for example, if I run the command adb shell am start -a android.intent.action.MAIN -c android.intent.category.LAUNCHER -d "/sdcard/Downloads/dcops.mp3" then it doesn't work Also I tried to run adb kill-server and then adb start-server, it also has the same problem Here is the log [1014] 1052 200124308000 E AndroidRuntime at org.apache.harmony.luni.platform.OSFileSystem.isAccessible(Native Method) [1014] 1052 200124308000 E AndroidRuntime at dalvik.system.BlockGuard$WrappedFileSystem.isAccesssible(BlockGuard.java:258) [1014] 1052 200124308000 E AndroidRuntime at org.apache.harmony.luni.internal.net.www.protocol.http.HttpURLConnection.request(HttpURLConnection.java:1034) [1014] 1052 200124308000 E AndroidRuntime at android.content.pm.PackageManager$NameNotFoundException.getPackageInfo(PackageManager.java:906) [1014] 1052 200124308000 E AndroidRuntime at android.content.pm.PackageManager.getPackageInfo(PackageManager.java:290) [1014] 1052 200124308000 E AndroidRuntime at 3e33713323
