---

26 Jul 2018 - PES 6 FIFA English Commentary - 1. Go to the \Dat folder and back up your original e\_sound.afs file (important) - 2. Now extract your preferred ... - 1. Go to the \Dat folder and back up your original e\_sound.afs file (important) - 2. Now extract your preferred file into the \Dat folder inside the game. - 3. Make sure you select the file "e\_sound.afs" in the language selection menu. - 4. Now create a "settings file". To do this, press the "Win" key + "Print Screen" so that it is in the notification area. - 5. Go to the \Dat folder and download the file named "PES6\_AudioOutput" to install. - 6. Restart your computer. If you have done everything correctly, you should see the file "Persistence.mp3" in your \Dat folder. In order to see the result, select the file and press the "Enter" key. - 7. During the game you will see that the game has become more realistic, and also now players will see not only the walls, but also the grass. - 8. If you have performance problems, you can reduce the difficulty level "Easy" in the console. To do this, type "savegame" without the quotes. Then press "Enter". Start the game by clicking on "Play Game". Now you can continue playing from where you left off last time. For example, if you took the last saved screenshot in the middle of the game and saved it in Savegame, you can start from where you stopped. Otherwise, you can restart the save by clicking on the folder icon on the top menu. This will open a dialog box where you can select the save you want to restart. In the save selection window, you have to click on one of the three buttons. Button with the letter "f" - saves all new files. Button with the letter "d" - saves only files in the current folder. Button with the letter "s" - saves all files in the folder specified in the previous selection. Select the save that you want to restart and then click on the "Restart" or "Restore" button. The save will restart and all your activity will be lost. If you have a recovery disk that has not been deleted, you can use it in case you had Windows 7 installed, but when you restarted the system you did not save the disk or did not have time to restore it. To use the recovery disk, insert it in the drive, then click "Restart". If you have a recovery disk, but with Windows 8 or 10, you need to either start your computer in recovery mode or use the "Kickstart" feature. If you don't have a recovery disk, use the instructions below Hold down the "Windows" or "Esc" key when you turn on your computer.
