PicoXT is a full-featured 80286 processor emulator using a simple assembly language and a static, interpretive PC-XT emulator written in C. It was written for the 26th year of the IBM PC-XT to help computer programmers familiarize themselves with Intel 386 CPU instruction set to use it for their own programs. PicoXT is the most complex program ever written for the PC-XT, requiring 789 source codes.

PicoXT is a member of the ISB's (Intelligent Systems Bulletin) 1986 ISB Awards. The world of new media and journalism is in a bizarre state of simultaneous transformation, revolution, and constant deterioration. As publishers disappear and journalists battle with declining advertising revenues, the Transformation Information: The world of new media and journalism is in a bizarre state of simultaneous transformation, revolution, and constant deterioration. As publishers disappear and journalists battle with declining advertising revenues, the opportunity for great new ideas and writers is becoming rarer and rarer. However, a few daring writers are beginning to find ways to break out of this rut and become the new media journalists they once dreamed of being. You just have to know where to look. If you are lucky, you will join a community of great writers with a shared dedication to the world of new media and journalism. If you are not lucky, you will find yourself writing the same day-to-day stories again and again, looking for the big story that no one is telling. But here are some of the things you can do if you know where to look: Find Stories At the Huffington Post, senior features editor Charlie Palmer discovered the world of uncensored blogging. He became a major force in the news business

because he has the capacity to find and tell big, important stories that no one else cared about. Search for the type of story you want to cover with Google. Try the keywords “new media journalist” and “start-ups” to find relevant news stories and bloggers who cover new media. Blog Herald has a listing of “Top 100 Online Blogs” that can give you a broad overview. When you find a reporter you like, email them to see what they are working on. Then, if you are just starting out, offer to write some sample posts for their site. This may not pay much money for a small-time blogger like me, but many seasoned journalists will be grateful for a fresh voice to
