Translations can be a mess if you don't use the right tools. If you don't write all your strings in resource files, you can end up with conflicts between different translation strings, missing translations, and language conflicts. ResXer can help you keep your translations in order. ResXer is perfect for editing those translation resources that you received from your customers. It makes it easy to add new strings, remove existing ones, or edit and enter comments. ResXer can even create images for you as required by some translations. As a matter of fact, ResXer is simple to use even if you have never modified a RESX file before. All you need to do is open a file and make your changes. No need to wonder what it does. Just start typing some text and press Enter. ResXer will then insert the text as a translation string without interfering with the original text. When you're finished, simply click the Save button to save your changes. ResXer is also fast and efficient. It can open files from all I
