Love it!! This software is the best mp3 encoder. It encodes mp3 to 320kb and it has no memory leaks or other problems. This program worked extremely fast and hasn't left any traces in my system. All I had to do was to install it and put the mp3s that I needed to encode in one of the folders. That was it. I am recommending this soft to every one who has an mp3 player. Keep up the good work! I have used this application and the only thing that I really don't like about it is that it does not allow you to select which quality level you want. This is a very useful feature, because you need to make sure you get the quality level that you want. I find it annoying that they have removed this feature and that it's not in the free version. Improvements: - Remove "per file" encoding process, always use batch process. - Add "%" as the default file size option to be used by winLAME whenever there is no file size set. - Highlight full size outputs in the
