Field of the Invention The present invention relates to a device for cutting an electric wire and, more particularly, to a device for cutting a electric wire which is thin and flexible. 2. Description of the Related Art A hollow body such as a pipe having a rubber seal or a nut provided with a thickened portion at the bottom is used for sealing and fixing a portable terminal apparatus, such as a wireless communication apparatus or a personal digital assistant. The hollow body is not particularly provided with a filter which ensures that the whole body does not rust in an external environment. However, if a battery is accommodated inside such a hollow body, a layer of rust may be formed on the inner surface of the hollow body during use of the apparatus, which may in turn allow infiltration of moisture from the hollow body into the battery. If the apparatus is operated for a long time in such a 3e33713323
