RegHide Description: Manual: 1.10.0.1908.1 (version 1414) RegHide Help: RegHide Usage: reghide -n hklmSubkey HKEY_LOCAL_MACHINE = Registry key to hide [Subkey name] = Key to delete -n = Enable this feature Here's an example of RegHide when used on a system on which the RegHide sample program has hidden the HKLM\System\... keys: C:>reghide -n HKLM\System\ HKEY_LOCAL_MACHINE\System\ e_ZRSAKjavqf318XtcVchgysqjIxbovsk_ C:> So this program is for data recovery of files and folders that have been lost or deleted. This program would also help the person when someone deletes a file or folder by mistake. It helps to recover files and folders from a partition or hard drive and makes that partition or hard drive like new. It can also scan for and recover hidden files and folders on a partition or hard drive that has been formatted or deleted without recovery. It works in a Linux environment only. The reason I use the term "anti-feature" is because Registry Key quarantine is the standard in Windows, and most anti-malware programs will flag and quarantine any Registry Key that does not have a backup copy. However, if a user deletes the Registry Key (without backup), the anti-malware program will detect this as an attack and use it as an indicator that they are using an Anti-Malware tool to remove malware. As such, the Anti-Malware program will flag the Registry Key as quarantined, and often will not list the Registry Key in the Scan List. Before using this

System Requirements For RegDelNull:

Currently in its development phase, the ATX Expansion is a *NEW* tool that works alongside our existing expansion tools by allowing users to build custom maps for the purpose of testing new functionality and features. We cannot currently confirm the tools in this toolkit for use on our live servers as it is a work in progress and not in a final state. Also, the ATX Expansion will be incompatible with Super Smash Bros. Brawl at the time of release. We do apologize for any inconveniences this may cause our users, but this change is part of the development process.
