What are the ways to do it in Python and in Android? A: You can use this function: `def loadedDB(filepath) if not os.path.exists(filepath): pass else: db = sqlite3.connect(filepath) cursor = db.cursor() cursor.execute("select * from database") results = cursor.fetchall() cursor.close() db.close() return results` Q: How to store multiple value in a single data property in Codeigniter? How can I store several values, for example name and address for a person in a property data? `class Person{ public $name; public $address; }` One of the possible solutions is having two separate property (name and address) and then combine them in the end. But I wonder if there is a better solution for storing multiple values in a single property? A: You can use array. `class Person{ public $name`
