## Easy NIC Test: FastSend Download (2022)

### Easy NIC Test: FastSend Crack+ Free X64 [Latest 2022]

\*\* FastSend is a very easy to use and lightweight application that allows you to send and receive packets at different speeds. Simple interface, with only three buttons to choose the size of the packet, enter your IP and choose a virtual interface. It is designed for a LAN/WAN, but also works for local use in the same computer. \*\*You can change the packet sizes (number of octets in a packet) and the speed that you want to use by clicking on a button and enter the size of the packet, IP and the speed you prefer (Mega/Giga and Megabits per second, or only by MegaBytes). \*\* The application is intuitive and easy to use, without any complicated setup (such as in the interface with wires). Once the interface is established, you enter the MAC, press the button 'Start' and wait for a couple of seconds to see the result.

You can also retrieve the connection status and packets sent/received. Copyright (C) 2017 Enwiz Technologies \*\*Auto. What's New \* version 5.0: \* Added support for 50Mbps modems. \* version 4.0: \* Added support for 100Mbps modems. \* version 3.0: \* Added support for GigaByte and GigaBit modems. IMPORTANT: If you are using a firewall, you may need to allow FastSend connection to access to your network interface. [Show More] Full Mac App Store Support for: \* version 2.5: \* Added support for 10Mbps modems. \* version 2.4: \* Added support for 7Mbps modems. IMPORTANT: If you are using a firewall, you may need to allow FastSend connection to access to your network interface. ## What's New In Easy NIC Test: FastSend?

After you choose your packet length and setup the required MAC for your computer or server, Easy NIC Test FastSend will generate an HTTP request and send it through your network interface. When your server receives this request, it will answer with a response so that you can see the success or failure of your network. As it's a simple application, it's easy to use and has a number of features: Packet length is between 1.063.5K and 1.097.5K packets or between 6.125 kB and 6.567 kB (with the packet length multiplier or between 6.25kB and 7.5kB) Packet size may be between 1.063.5K and 1.097.5K bytes Advertise any packet length (while the packet length is constant) Provide a simple interface to display the request and response The response packet will be sent with a timestamp Packet generation starts after the setup completes Examples: 1. To send a 0 byte packet, simply choose the following options (check boxes): (Then choose a packet length from the following list and click the "Send" button.) 2. To send a packet size of 100 bytes, choose the following options: (Check the box for "Advertise packet size".) (Then choose a packet length from the following list and click the "Send" button.) You will see the following in the application: 3. The response packet has a timestamp. 4....and if everything goes OK, you will see a HTTP 200 OK web page come back from your server. Easy NIC Test: FastSend Visual Example: Easy NIC Test: FastSend with time reporting (by packet length): Easy NIC Test: FastSend with progress reporting (by packet length): 5. Time + Progress Packets: 6. By packet length: 7. By size: 8....and a progress bar showing the percentage completion: Easy NIC Test: FastSend Website: What's New in Easy NIC Test: FastSend? The easiest application to use to test network interface card performance on fast networks. Easy NIC Test: FastSend Screenshots: Screenshots: Easy NIC
