Field of the Invention The present invention relates to a computer system. 2. Description of the Related Art As computers become faster and more powerful, an increasing number of tasks previously carried out with a computer system can be carried out by a computer user manually. For example, the user may build a list of articles for purchase or delivery manually. As another example, the user may manually compile a list of articles for a trade show. As yet another example, the user may manually search for the names of specific people stored in a computer system. In order to reduce the burden on the computer user and to improve the speed and accuracy of these tasks, it would be advantageous to provide a computer system which stores the lists of articles and which automatically searches the lists for user-specified items.Q: NameError: global name 'OS' is not defined, In python 3.7 There is an error as follows.
