Why Windows 7 Shell folders won't show size until you click the folder

Hi. I have 7 HP notebook with I use Windows 7. All my folders are in Shell view and I use 'Open With Explorer' extension installed. The only problem is that I can see the size of my subfolders on my notebook but I cannot see them on desktop. I need to click a folder, which opened in Explorer to see its size and I really don't like to do this. I use other PC on a network with Windows XP and Explorer shows the size of Shell folders right after opening them without clicking. Is there any way to enable this functionality for 7 HP notebooks too? Thank you for your advices, Irena.

Windows Explorer--show date modified info on files/folders

Hello, I like Windows Explorer for showing the date modified of files and folders but I like to see the date modified by clicking on the items. I did a research to change the setting of Windows Explorer but I couldn't find it anywhere. All the time I like to know the date modified by Clicking on items. Like to see the information like that:

1. Windows Explorer--show date modified info on files/folders
2. Web Browser--show date modified info on files/folders
3. My Computer--show date modified info on files/folders

I don't like to have the information "surrounding" the items, I like just a tooltip where i can see the date modified. Is there any way to get it? Shell Folders
