What's New In GitHoard?

Get the fastest and most powerful Git client available today. Who says you have to wait hours for GitHub? Say goodbye to slow cloning and misdirected clicking as Terminal Git, the fastest, most powerful Git client available, opens the clone dialog in a split second and opens new files in memory, not the file system. Fast. Even if you're not familiar with Git or you've been waiting for hours for GitHub to clone your repositories, Terminal Git will blow your previous git experience out of the water. Awesome. GitHub is great and all, but it can't replicate the speed, power, and UI that you get when using Terminal Git. Simple. GitHub is great and all, but there's a lot to remember and setup, especially when you're new to Git. Our goal is to make Terminal Git as simple as possible for the Git community. Isolated. GitHub is great and all, but you may prefer to clone in an isolated repo. Terminal Git understands this and lets you set different accounts, branches, and remotes to clone from. Terminal Git isn't for everyone. GitHub is great and all, but if you're looking for an easy to use clone client, Terminal Git might not be for you. We're constantly improving Terminal Git to make it easier to use and faster. In the meantime, make sure you're using the latest version by downloading the zip from our website. License: GPL.
