I'm trying to modify a PHP project to be compatible with C#, however I'm having trouble with the StreamReader class. The method ReadToEnd() is not working for some reasons so I'm using the other method: public string ReadLine() { while (true) { var line = ReadBuffer.ReadLine(); if (line == null) { return null; } return line; } } The ReadBuffer is a Buffer class that is used to read a line. When I use the ReadToEnd() method, this is the result I'm getting: The problem is that I'm not getting a useful line. The output should be: var f = document.getElementById('json').value; var console = { debug: function() { if (window.console) window.console.log.apply(window.console, arguments); }, info: function() {}, warn: function() {}},
