This utility provides the user with a simple but effective way of monitoring the UPS battery and line voltage. The user may be easily alerted to a power failure and can in turn shut off either a computer or PC UPS. WinMust also includes UPS load analysis features that are a much more effective way of monitoring UPS loads, than using AC line voltages. Load analysis can be used to determine the needs of an application, and also provide protection against failure or an overload. WinMust uses a virtual keyboard so you do not have to type in your load, results are automatically recorded and presented in a few easy to read screens. WinMust includes advanced features that are not available in other UPS monitoring programs, including a UPS Alarm and a True Load Analysis. One of the unique features of WinMust is the ability to attach a virtual external drive to the UPS. By using the virtual drive the user can easily generate a backup copy of a computer that is in an UPS failure or monitor the computer while it is in an UPS failure. The program can save the state of the computer, run a backup utility, or just watch the desktop as it is brought up, and then automatically starts a backup utility and start your computer. The main features of WinMust are as follows: * Fully compatible with all Mustek UPS (uninterruptible power supplies). * Runs as a service and runs always on the desktop. * No requirement to have installed an UPS on the computer. * Multi-threaded and multi-tasking. * Works with all MAC and Windows 2000, ME, XP, and Vista OSs. * Major upgrades are available. * Reads the CANBUS report and has been tweaked to work with newer versions. WinMust controls your Mustek UPS with the following functions: * Alarms * Battery Voltage * AC line Voltage * Battery Status * AC Status * The type of UPS you have can be identified from the System Tray Icon. * Available in all versions of Windows. * Execute simple tasks on the UPS when it is in Operate. * Keep the computer alive when there is a power outage. * Can be completely automatic. The WinMust Utilities supports the following UPS models: * Type A * Type B * Type C * Type D * Type M * S * XD-30 * Z-UPS FC-30 * Z-UPS FC-60 * Z-UPS L
