A: You need to run the patch against the SSL Listener. PATCH /opt/wingate/wingate-server/src/listeners/ssl/ssl_listener.cpp This is because the call to the SSL Listener's initialize function is called using the parent class' allocate function and as they use the same name, the child function will call the parent function. However, the code that does the allocating is protected by a lock (to prevent concurrent use by the 2 threads). The patch removes the call to the parent's function and implements the allocating of the SSL Listener's internal state in the child class' method. Hope this helps. E/wingate-SVN-1.0.0-20633018:error:SSL Listener failed to initialize due to error in connect() method. It may cause problems in Wingate Server. (code:SSL_PENDING) \$ CREDITS: This worked for me. I'm using 6.30.1 version. A: As per the proxy-win, wingate-server user guide PATCH /opt/wingate/wingate-server/src/listeners/ssl/ssl_listener.cpp to patch the SSL listener

Cognitive and Social Issues in Health Information Use: A Feasibility Study of the Cognitive and Social Issues in Health Information Use (CSI-HIU) Questionnaire. Impact of health-information use on the user's ability to use information and navigate healthcare processes is critical to providing patient-centered care. This study aimed to develop and assess the psychometric properties of a questionnaire for use in assessing cognitive and social issues in health-information use (CSI-HIU). A cohort of patients enrolled in a quality-improvement initiative at a tertiary-care academic medical center were offered the CSI-HIU. Data were collected using an online survey from January to April 2018. Item-development strategies were used to develop and refine a 35-item questionnaire. Items were evaluated for face and content validity. Mean item-level reliability was calculated using the Kuder-Richardson-20 coefficient. Cronbach's alpha was used to determine scale-level reliability. Exploratory factor analysis was conducted to identify underlying subscales of the CSI-HIU. The final instrument consisted of 26 items. Scores on each item were reported as an L
