When it comes to electric pianos, the Wurlitzer 200A has a distinctive sound that you just can't find elsewhere. However, the Wurli V2 Crack Keygen digital piano delivers the most realistic sound possible for this venerable instrument. It faithfully reproduces its tone, sound character, and pitch while it offers a 16x sampling rate. Must have, I love it. I downloaded it to work on a classical piece that I'm writing. I started with the Les Paul Epiphone, and something wasn't working right, so I just downloaded Wurli V2 and it worked like a champ and I'm playing around with it. Wish I had thought of it, there is not one thing wrong with it. Guys, its a piano not a synth. Use it as a piano and thats it. You could even make a solo piano track with it and not expect it to sound good. I'm playing a piano every day and it sounds amazing. Do yourself a favour and don't treat it like a synth. Arturia has made a fantastic analog piano Wurli V2! Sound like a piano but gives you the choice of Amp, Vox and Leslie Organ. If you need a classical piano I recommend the Steinway Model D Digital Piano. It has many of the features of a Wurli V2 but sounds amazingly realistic. Very nice Pianino, i have an old one that sound very bad but this is much better, sounds very nice :) do you think the way it's being sample could work with a bigger piano? I have one. I need your advice on how to make the sound better!!! I had only the best experience with my first Wurli. It is a luxury to play, for sure. But, it is not a synth and I have to say that Arturia did an extremely good job. The room for tweaking and playing is massive. Best thing, the sound is perfect. I am playing it everyday, at school and at work. W
