Video To MP3 Converter Crack

Video To MP3 Converter allows you to extract the audio stream from video files and encode it to the MP3 format. It can be easily handled by all user levels. The interface of the program is plain and easy to navigate through. Video clips can be imported into the queue by using either the file browser or treeview (the "drag and drop" method is not supported). Batch processing is allowed. In the list you can read the name, codec name, start and end time, along with duration and status of each video. All you have to do is establish the output destination and proceed with the encoding task. Moreover, you can change audio parameters when it comes to the sample frequency rate, channel mode, bit rate, quality and others. Settings can be restored to their default values at any time. In addition, you can remove an item from the list or clear the entire queue, edit metadata (e.g. title, artist, album, year), preview tracks in a built-in audio player, enable Video To MP3 Converter to automatically turn off the computer after encoding, and more. The audio extraction tool runs on a low-to-moderate amount of system resources, has a good response time, quickly finishes a task and manages to keep a good sound quality in the output audio tracks. No errors have popped up during our tests and Video To MP3 Converter did not freeze or crash. Unfortunately, there is no help file available and the interface needs some improvements. Other than that, we strongly recommend Video To MP3 Converter to all users.
